

June 2018 Winner Lighting Application Contest

Garden Light LED | Tampa, FL

A FIXTURE FOR LIFE

INNOVATIVE. PRECISE. SUSTAINABLE.

Houston Luxury Lighting used **Garden Light LED** Submersible 3, Large Wall Washers, and Visionary Series fixtures to help fulfill architectural landscape lighting for residential application.

Project Description

This project Houston Luxury Lighting used a variety of Garden Light LED fixtures for the front of the residence which included: S3, V2, Large Wall Washes and S1 Halo. These fixtures were applied in areas throughout the front of the residence such as the driveway, garage, and along the front entry way. Houston Luxury Lighting used up-lighting technique to highlight the strong, architectural features along the residence.

1B

“Environmentally Conscious Products. Greener energy resources are key to the planet’s well being.”

1C

Project Continued

While designing the backyard space for the residence, Houston Luxury Lighting resulted in many fixtures such as the V2, V3 Down, and S3. These fixtures were again used to be applied along the side of the yard, the upper and lower terrace, and lastly, the side of the residence soffit.

As an end result, the homeowner was very pleased with the overall design of the home and admits their home outshines their surrounding neighbors.
