

# LIGHTING THE PATH TO OUTDOOR SEATING AT NIGHT WITH MICRO LED LIGHTS

A Fixture For Life

INNOVATIVE • PRECISE • SUSTAINABLE

## — Lighting the path to outdoor seating at night with micro led lights

If you are looking for outdoor furnishings that offer an exceptional design with stylish features that are sustainable and sturdy enough for commercial use, look no further than the Tandem bench seats from Anova Furnishings. With alluring design highlights found in the Tandem collection, and four different creative laser cut patterns to choose from, the unique outdoor bench style seating designs evolved from the imaginative viewpoint of landscape architects.

These exceptionally planned bench designs from certified Landscape Architects ensured that their outdoor furnishings would attractively blend into any landscape area where elegant outdoor seating and led path lights were desired, whether it was intended for a residential or commercial outdoor landscape lighting application.

# — Improve your ambiance nightly with functional outdoor lighting

When you're planning to add seats outside for your guests and visitors to use through the day and into the night, it's always important to consider the functionality, beauty, safety and reliability, which is exactly what Anova has done. The Anova line of flat bench seats are extremely practical for many types of applications indoors or outdoors while offering the superior seating functionality that embraces an enhanced design style with features that are sure to suit any landscape architecture campus or building plan design, whether that's industrial, contemporary or modern.

To keep the design and elegance of the Anova benches lasting long into the nights for anyone that passes down the pathways to enjoy, the Tandem series of benches offers a high-performance warm 3000K LED color output spectrum under the benches for you and your guests to benefit from through the night. By highlighting the bottom areas of these sustainable benches with energy efficient led lights and illuminating the paths which they rest on, your visitors are always going to feel safe and welcomed anytime of the night.

# — Low voltage lighting to illuminate fine outdoor furnishings

As a fine outdoor furnishings manufacturer that has created four impressive and unique designs in high demand around their Tandem bench series of seats. Anova knew they needed to expand the features and practicality of this seating series for its consumers using a product line with the same vision for American-made quality. With quality and small specialty lighting solutions in mind for their highly sought-after line of outdoor seats, Anova chose the OWL micro series of led lights from garden Light LED.

The micro series of specialty mini outdoor LED lighting products that Garden Light LED consistently delivers to its American manufacturing partners and landscape lighting companies around the USA is first-class. Having that manufacturer's vision of adding long-term value to all outdoor landscaping products and providing top-quality sustainable solutions with one-of-a-kind product designs that were sure to meet the needs of their clients nationwide, the Tandem bench series of outdoor furnishings integrated a true low voltage lighting solution that was sleek, modern and beautifully lit the pathways for its guest strolling around the properties at night.

A few of the many benefits of using Garden Light LED specialty-led landscape lighting products with outdoor furnishings in.
