

Trident Shield Stake

APPLICATION

Designed for professional landscape lighting installations requiring a stable, corrosion-resistant ground mounting solution. Three stainless steel spikes provide multiple points of ground engagement for improved stability in a variety of soil conditions.

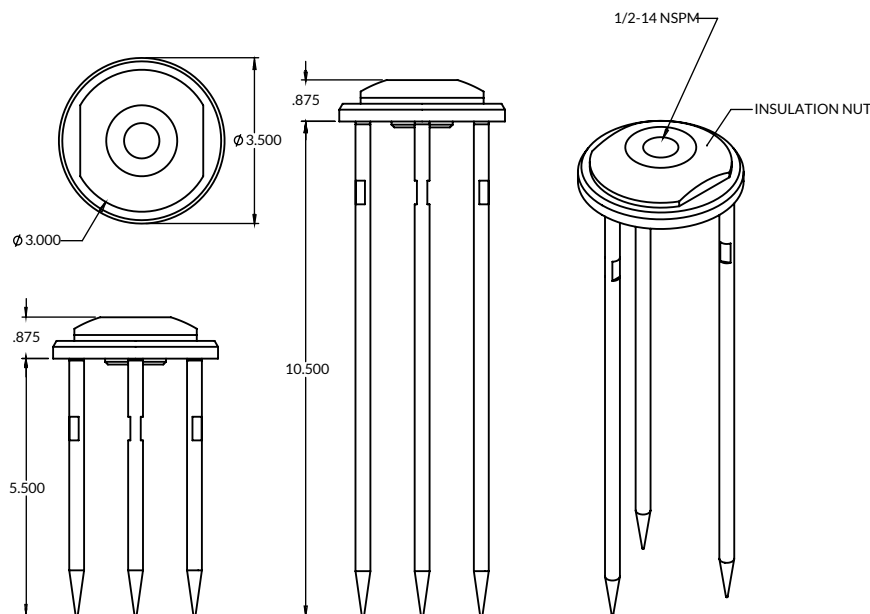

FEATURES

- **Three-point stability:** Triple-spike design provides a secure foundation and helps resist fixture rotation and movement
- **317 stainless steel:** Durable, corrosion-resistant construction for long-term outdoor use
- **Electrical isolation:** Polycarbonate composite threaded insert electrically separates the mounted fixture from the stainless steel stake
- **Added surge protection:** Insulating insert helps reduce the path for ground-transmitted electrical surges, including those associated with nearby lightning activity
- **Universal mounting:** Accepts standard 1/2"-14 NPS landscape lighting fixtures
- **Expanded compatibility:** Directly supports Garden Light LED S2, S3, and S2/S3 Swivel mounting configurations
- **Two sizes:** 6" and 11" models accommodate different soil and installation conditions

CONSTRUCTION

Constructed from 317 stainless steel for strength, durability, and corrosion resistance. Three precision stainless steel spikes create a stable ground-mounting platform. A polycarbonate composite threaded insert provides electrical isolation between the fixture and stainless steel stake.

DIMENSIONS

SPECIFICATIONS

ATTRIBUTE	SPECIFICATION
Material	317 Stainless Steel
Insert	Polycarbonate Composite
Mounting Thread	1/2"-14 NPS
Sizes	6" / 11"
Configuration	Three-Prong
